509-932-4037

Description of proposal:

This project will construct the wastewater treatment plant improvements identified in the Wastewater Facility Plan, which include the following:

1. New headworks screen in the existing screen channel.
2. New influent flow meter at the existing headworks.
3. Conversion of the existing clarifiers to post anoxic basins.
4. New carbon addition system to provide a supplemental carbon source for effluent total nitrogen polishing.
5. New secondary clarifier splitter box.
6. Two new circular, center feed, peripheral withdrawal secondary clarifiers.
7. New submersible RAS/WAS pump station and associated piping, valving and instrumentation.
8. New scum pump station and associated piping, valving and instrumentation.
9. New sludge drying beds.
10. Electrical upgrades as necessary to accommodate the new equipment.
11. New 175 kW diesel generator that can provide backup power to all essential process systems including influent pumping, aeration, RAS/WAS pumping and UV disinfection.
12. SCADA modifications.
13. New non—potable water system to include two self-priming centrifugal pumps, a pressure sustaining valve and chlorine addition system.
14. Sludge lagoon decommissioning. This scope of work assumes that the sludge lagoon decommissioning will be bid as an alternate scope of work and will only be awarded by the City as funds allow.
