

## Project Description

This is a small P.V. array eventually consisting of 8 standard solar panels. The array will have 4 south facing panels that are adjustable and 4 east/west facing bi-facial panels that are fixed and mounted vertically. Total Size is just under 3 kilowatts.

The purpose is to provide seasonal power to operate and maintain equipment used on site in support of timber management. Due to the size of the property, there will be no impact to any neighbors. No part will be visible from any adjacent property.

The construction plan has 4 panels on 4x4 vertically mounted posts and 4 panels will be on an angled fixed mounting system (Commercially produced mounting system). The maximum height of any part of the system will not exceed 14 feet.

(Idaho Code 31-3805)

This land: ☐ Has water rights available to it  
☒ Is dry and has no water rights available to it.

**Idaho Code 31-3805** states that when all or part of a subdivision is "located within the boundaries of an existing irrigation district or canal company, ditch association, or like irrigation water deliver entity ... **no subdivision plat or amendment to a subdivision plat or any other plat or map recognized by the city or county for the division of land will be accepted, approved, and recorded unless:**"

- A. The appropriate water rights and assessment of those water rights have been transferred from said lands or excluded from an irrigation entity by the owner; or
- B. The owner filing the subdivision plat or amendment to a subdivision plat or map has provided for the division of land of underground tile or conduit for lots of one acre or less or a suitable system for lots of more than one acre which will deliver water to those landowners within the subdivision who are also within the irrigation entity with the appropriate approvals:
  - 1. For proposed subdivisions located within an area of city impact, both city and county zoning authorities must approve such irrigation system.
  - 2. For proposed subdivisions outside of negotiated areas of city impact, the delivery system must be approved by the Planning and Zoning Commission and the Board of County Commissioners with the advice of the irrigation entity charged with the delivery of water to said lands (e.g., irrigation district).

To better understand your irrigation request, we need to ask you a few questions. Additional pages can be added. A list of the map requirements follows the short questionnaire. **Any missing information may result in the delay of your request before the Planning and Zoning Commission and ultimately the approval of your irrigation plan by the Board of County Commissioners as part of final plat approval.**
